## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Carter (US Patent 5,797,412).

With regards to claims 1-5 and 8-12, Carter discloses a method of fastening wherein first and second brackets 122 (figure 16) are rotatably attached to first and second assemblies (link members 50, fig. 12), and perpendicular arm portions (prongs 126 or 128) of the first and second brackets are rigidly attached together by rigid bolt and nut 136 such that the mounts bracket retain rotational freedom around a rotation axis (going through screw 136, fig. 16), see column 6, lines 15-34. Applicant should note that the brackets of Carter are connected in at least two positions along the axis of rotation provided by bolt and nut 136.

For claim 6, prongs 126 are spaced from each other.

For claim 7, portion between prongs 126 and 128 can be manually grasped for positioning.

### ***Response to Arguments***

3. Applicant's arguments with respect to claims 1-12 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
